## Environments We Love!

### WEEKLY WEDNESDAY MANUFACTURER UPDATES

Each week, Ginger Grant Group shares manufacturer updates and promotions! Last time we took a look at furniture we love from [Nightingale](#), [Open Plan Systems](#), and [Alea](#). In this newsletter, we put the spotlight on environments we're head over heels for, such as education, senior living, and healthcare, featuring Krug, Intensa, Gressco, Hekman, and Stablerise. For a closer look, click the images below!

#### *Education*

This week, we look manufacturers like Gressco, Krug and Hekman that provide furniture solutions for spaces in Education such as classrooms, lobbies, lecture halls, and even dorm rooms.

Click the image above for more information!

#### *Senior Living*

In the spotlight this week are Hekman, Krug and Intensa to share their offerings in furniture for Senior Living, from lobbies to dining rooms, sitting rooms to bedrooms, including extended care options.

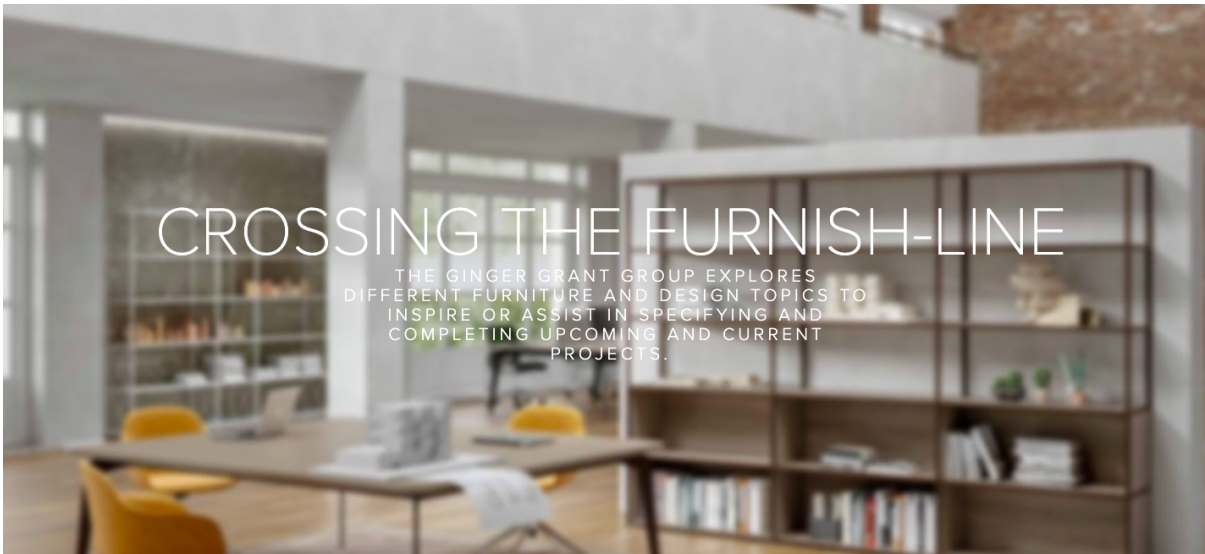

Click the image above for more information!

#### *Healthcare*

Our highlights this week shine on healthcare furniture from Krug, Intensa and StableRise. Our manufacturers offer casegoods, tables and seating, medical beds, and adjustable height workstations.

## Education

### Manufacturer Product Spotlight

#### Gressco: Early Education

([https://gresscoltd.com/media/wysiwyg/Arndt\\_2012\\_Design\\_of\\_Learning\\_Spaces.PDF](https://gresscoltd.com/media/wysiwyg/Arndt_2012_Design_of_Learning_Spaces.PDF))

CENTENNIAL ELEMENTARY, HOUSTON

The design of learning spaces is rightly gaining more and more pedagogical attention, as they influence the learning climate and learning results in multiple ways. General structural characteristics influence the willingness to learn through emotional well-being and a sense of security. Specific structural characteristics influence cognitive processes, from visual and acoustic perceptions, via attention to the model, to processes of comprehension and reflection. Aspects of the design of the learning space also modify the interaction among students and between students and their teacher. Furthermore, the different requirements that have emerged through the development toward a learning society and the explosive increase of available information in our society require changes in the design of learning processes and thus of learning environments.

**Krug: Higher Education ([https://krug.ca/pdf/Krug\\_Furnitureland\\_Case\\_Study.pdf](https://krug.ca/pdf/Krug_Furnitureland_Case_Study.pdf))**

As an example, Furnitureland South's newly redesigned Education Center is a complimentary, world-class venue offering a comfortable and professional gathering space for meetings, networking events and conferences. The 173 seat state-of-the-art facility functions as either an intimate classroom setting or a large, theatre-style environment for comprehensive meetings and presentations. V2 tables and Aqua mesh back chairs assisted in creating the optimum learning environment.

## Hekman Contract: Higher Education (<https://hekmancontract.com/product-list.php?shopType=room&searchTerm=dorm%20room>)

**Shelf:** This shelf is constructed with engineered wood panels and is finished with select veneers and a durable UV coating. The top of the shelf is made from a high-pressure laminate that mimics the look of natural wood grain. For added durability and resistance to damage and wear, the shelf features a protective PVC edge band. The combination of these materials ensures that this shelf will be a stylish and long-lasting addition to any space.

**Bed:** The bed can be configured as either a bunk bed or a lofted bed, providing versatility and flexibility to meet a variety of needs. The frame also offers a choice of either spring coil or platform deck options, so you can select the type of support that is best for your sleeping preferences. The bed height is adjustable to 8 different positions with the Easy Adjust feature, making it easy to customize the bed to your desired height. Furthermore, all components can be easily assembled without the need for any tools, making it a hassle-free setup.

## Senior Living Manufacturer Product Spotlight

**Hekman Contract (<https://online.fliphtml5.com/wxutw/xsza/>)**

Meeting the care and housing needs of future middle market seniors will require practical solutions in the design and construction of properties and their associated services. While striving for affordability, it is important that careful research and comprehensive planning for any interior design cost-saving measure meet regulatory requirements, deliver maximum aesthetic appeal, and address residents' functional needs.

**Krug ([https://krug.ca/pdf/HEALTH\\_PRODUCT\\_DECLARATION\\_HPD.pdf](https://krug.ca/pdf/HEALTH_PRODUCT_DECLARATION_HPD.pdf))**

According to the Krug's Health Product Declaration, all Krug product offerings can be specified to meet the Healthy Interiors goal version 2.0 of the Safer Chemicals Challenge. Most product solutions offer multiple material options for customers. Restricted materials and chemicals can be avoided through careful customer specification.

Intensa

(<https://shop.grahamfield.com/nosync/productimagesV2/ProductAdditionalInfoItemOriginal7693.PI>)

As the practice of medicine is being administered in new and unique venues, healthcare buildings are changing. Today's Medical Office Buildings (MOB) are creating more competitive atmospheres to recruit new patients and employees. Uninviting surroundings of old medical facilities built many years ago are being rebuilt at a rapid pace. These new designs have warm and inviting elements welcoming patients with a home-like environment. However, this warmth seems to stop at the waiting rooms. Exam rooms still frequently adopt a one-colorway story that does not reflect today's healthcare trends.

**Healthcare**

**Manufacturer Product Spotlight**

# Krug

([https://krug.ca/pdf/HEALTH\\_PRODUCT\\_DECLARATION\\_HPD.pdf](https://krug.ca/pdf/HEALTH_PRODUCT_DECLARATION_HPD.pdf))

Krug is a leading manufacturer of healthcare furniture, offering durable and ergonomic seating, tables, desks, and storage solutions for medical facilities. Their products are designed to provide comfort and support for patients and healthcare workers while creating an inviting environment that promotes healing. Krug's healthcare furniture is known for its functionality, durability, and aesthetic appeal, making it an excellent choice for any medical facility looking for high-quality and stylish furniture solutions.

## **Intensa (<https://intensa.net/pdf/Brochures/Intensa-Exam-Solutions-Brochure.pdf>)**

As the practice of medicine is being administered in new and unique venues, healthcare buildings are changing. Today's Medical Office Buildings (MOB) are creating more competitive atmospheres to recruit new patients and employees. Uninviting surroundings of old medical facilities built many years ago are being rebuilt at a rapid pace. These new designs have warm and inviting elements welcoming patients with a home-like environment. However, this warmth seems to stop at the waiting rooms. Exam rooms still frequently adopt a one-colorway story that does not reflect today's healthcare trends. Intensa wants to help change the current environment by offering one of the largest color stories for the exam room, and if your current exam table is in need of an update, they offer replacement options that can be upholstered in a variety of vinyl colors and patterns.

## **StableRise (<https://stablerise.com/use-cases/improving-quality-of-care/>)**

The demands of the EMR with entering and retrieving data during a patient engagement forces caregivers to focus on their computer screen at the expense of their patients. The StableRise® helps solve this problem by enabling the healthcare provider to remain patient-facing for better eye contact, nonverbal communication, and interpersonal social cues. The amount of time the provider spends focused on the patient instead of the computer screen enables superior care delivery, improves the patient experience, and builds a long-lasting patient/provider relationship.
