Architectural Products For Your Project

BI-WEEKLY MANUFACTURER UPDATES

Every other week, Ginger Grant Group shares manufacturer updates and promotions! Last time we looked at furniture and architectural products from manufacturers like Krug, Intensa, Gressco, Quiet Earth Moss, Ezobord, and MORE in preparation for NeoCon! In this issue, we share a variety of beautifully functional architectural products from Alea, Spectrim, and Ezobord. For a closer look, click the images below!

Alea

This week, we shine the spotlight on the modularity and diversity of Alea's A65 demountable wall, from the straight and curved glass panels to the integratable wood finish shelf wall panels. The A65 can provide partition for functionality and privacy so that you get the most out of your commercial space.

Spectrim Building Products

In this issue, we look at the versatile range of Spectrim's Ven4ma wall protection paneling that both architects and designers will love, we explore the catalogue of gorgeous and durable flooring finishes from Spectrim Floors, and we highlight the power of MicroTrim to help protect your corners.

Ezobord

In this feature, we highlight Ezobord's acoustic ceiling and wall treatments, with a focus on a nature-inspired ceiling baffle in a wide range of colors, a versatile modular ceiling rail which integrates with other ceiling baffles, but also offers optional LED lighting, and an acoustic wall panel with custom branding.

Alea

Architectural Products

A65 Demountable Wall

(<https://www.aleaoffice.com/foto/download/63514d6f3a582202210201530230.pdf>)

A65 is a unique and innovative partition wall system, simple and sophisticated yet entirely customizable, perfectly complementing Alea's 'custom made' philosophy.

A65 is modular, flexible and integratable with ceilings and stud walls, it has been designed with minimal aluminum details and 'seamless' flush doors without any exposed profiles. A65 is available with solid or glazed panels, sliding or swing doors and a wide range of finishes to suit any design aesthetic.

These wall panels also provide a versatile range of mounting options. A65 partition wall system is available as single glass, double glass or panels, which can be equipped with pivot or sliding doors.

The “Standard” type aluminum profiles are characterized by an exclusive and minimalist design; the 23 mm [0.91”] thin lower profile is equipped with an exclusive patented micrometric levelling system. It is possible to integrate the “Standard” system with curved corners, in the single set-off and double glass versions, to meet higher design needs.

A65 Door Options

<https://www.aleaoffice.com/foto/download/63514d6f3a582202210201530230.pdf>

All swing doors are equipped with concealed pivoting hinges with 125° opening ball bearings and are supplied with a lever handle in satin stainless steel or black finish. Other lock and handle options are available. In the single-pane version, the glass of the flush door has the same thickness as the adjacent glass

All swing doors feature a unique 5 mm [0.2”] micro frame. In the double-glazed version, stratified glass of different thicknesses are used to increase the acoustic performance.

Sliding doors are available with glass or paneled, framed around the entire perimeter with aluminum profiles. They are equipped with an exclusively designed vertical handle and integrated soft closing/opening devices.

Paneled doors made with a structural sandwich thickness of 66 mm [2.60”] with scratch-resistant Italian laminate finish or wood veneer. These doors are supplied with acoustic-performant material.

A65 Shelf Panel Option

(<https://www.aleaoffice.com/foto/download/63514d6f3a582202210201530230.pdf>)

The A65 wall is completed with aluminum or polycarbonate connections that allow to link parts or create multiple corner types. Thanks to this modularity within the A65, it's possible to swap some of the solid or glass panels for a "working-wall" which provides shelving built into the panel.

The working-wall can be configured with floor-to-ceiling or suspended panels and framed by double or single glass walls. The wall can be equipped with metal storage units, with transparent or back-painted glass shelves.

The multiple types of connections available contribute to the aesthetic definition of the project and at the same time allow a quick and simple installation.

Completely inspectable modules with technical compartment designed for electrical cables housing.

Spectrim Building Products Architectural Products

Ven4ma

(https://www.spectrimbp.com/_files/ugd/04df6e_3620ff1e7a404e84a0672af8cfe71627.pdf)

Ven4ma® by Spectrim is engineered to provide durable wall protection with aesthetic appeal and exceptional life-cycle value through reduced maintenance and repair costs. Ven4ma® Protective Wallcovering is designed for use in healthcare, hospitality, food service, assisted living, retail, and corporate interior high traffic areas that are subject to abuse from impact, dents, and staining. Ven4ma® Wall Protection boasts the most realistic wood finishes in the industry.

Spectrim's standard thermofoil film finishes wrapped over solid Class A fire rated ABS create highly durable and decorative trim parts. Mix and match to create a stile and rail wainscot or use contrasting colors for a 2-toned effect. Provide protection against damage from chairs, gurneys, and other objects.

Ven4ma® Components are typically used in waiting rooms, high traffic corridors, or equipment storage areas creating a low profile stile and rail pattern around the Ven4ma® sheets. All of these moldings are notched in the back to fit over wall sheets to hide the trimmed sheet edges.

Spectrim Floors (<https://yz81a1.a2cdn1.secureserver.net/wp-content/uploads/2022/08/Homestead-Featherwalk-with-SetAGrip-Brochure.pdf?time=1680728121>)

Spectrim believes flooring is meant to be enjoyed, not labored over. That's why they looked to nature for an ingenious solution to install their commercial flooring without the use of glue. Spectrim found the answer in the gecko lizard. By mimicking the gecko's feet, their team created a new installation paradigm with Nature's Technology. They call it Featherwalk with SetaGrip™.

You'll find SetaGrip in the Homestead Collection, available in two sizes and boasting 10 SKU's in complimentary colorways and patterns, allowing you to mix-and-match. Homestead, as with all Spectrim's flooring, is made with 100% recyclable virgin vinyl and zero phthalates.

All Spectrim flooring is waterproof and engineered to their exacting performance and environmental quality specifications.

MicroTrim

(https://www.spectrimbp.com/_files/ugd/04df6e_b99119986393496795080dff80939ba4.pdf)

MicroTrims offer an unobtrusive transition between Ven4ma sheets. The vertical, horizontal, and corner trims are available in 10 foot lengths and in the most popular Pantone finishes. The 3/8" protrusions of the trims allow for a low profile solution that adds to the overall design element of the installation.

- understated transitions
- inexpensive
- ease of installation
- low profile
- typical industry profiles
- popular Pantone finishes

Ezobord Architectural Products

Summit Ceiling Baffles (<https://ezobord.com/summit>)

The performance of acoustic panels depends on material and geometry. Summit proves that bringing the right combination of materials and design-work can lead to astonishing improvements in acoustic performance.

EzoBord's three-dimensional Summit baffle system proves that bringing the right combination of materials and design-work can lead to astonishing improvements in acoustic performance.

With an incredible acoustic performance of NRC 1.30 (Type A - direct applied), the Summit system perfectly balances high performance acoustics with high design, high-performance treatment options to the acoustic panel market.

Available in Sulphur, Three Sisters, Castle, Assiniboine, Crowsnest, Yamnuska shapes.

Rail Lit Baffle (<https://ezobord.com/rail-baffle/>)

With Rail, Spectrim is going beyond illumination for interior spaces. True to their acoustic roots, Spectrim incorporates the performance of EzoBord material to LED technology providing a synergistic relation between acoustics and lighting as a solution to high-end noise levels, reverberation and poor lighting issues common to open spaces. Designed in collaboration with Metalumen, Rail comes with a variety of light color temperatures and as a mix with Spectrim's classic Baffle Systems ("Vesi" and "Veldi").

Versatile configuration options make Rail a great choice for a commercial space of any size or shape:

- ALIGNED
- CROSS
- CORNER
- SQUARE
- T-SHAPE
- RECTANGULAR

Custom Design (<https://ezobord.com/custom-design/>)

EzoBord applications include walls and ceilings in corporate office settings, theatres, cinemas, gymnasiums, home theatres, recording studios, broadcast studios, classrooms/music rooms, restaurants, and night clubs. They perform excellently in virtually any space where the quality of acoustics and sound dampening are a concern.

Looking to bring your product ideas to the market? With EzoBord's team of acousticians, industrial designers, color technicians, and furniture application specialists, they have the process and expertise to transform your ideas into unique solutions to fit any environment.

EzoBord offers custom acoustic solutions made with sustainable materials in local production facilities, such as this branded custom art design engraved into the EzoBord acoustic wall panel in the Navy Broadway Complex (pictured). Choose EzoBord as your new creative partner.
